HOW TO FIND YOUR RING SIZE

New Zealand uses the same ring size standard as the UK and Australia, which uses alphabetical letters that are sometimes followed by fractions, e.g., H, L and 1/2.

At Crawford Hill Jewellery we use the inside diameter to measure ring size, which is the distance across the centre of the ring between its two inner edges (see image).

You can determine your ring size by measuring the inside diameter of a ring you have at home. Then use the conversion table below to see what letter/ring size you are and choose that letter on the website when purchasing a ring. Alternatively, if your ring size isn't available on our website or you are unsure about sizing you can [contact us](#) for any additional help or information.
